Laminated NWPP Bag

A laminate is a material constructed by uniting two or more layers of material together. The process of creating a laminate is lamination, which in common parlance refers to the placing of something between layers of plastic and sealing them with heat and/or pressure, usually with an adhesive.

With lamination, it can add more color print or the material. Meanwhile, It will make the bags more strong also sometimes water proof.

Lamination NWPP is consist of Lamination film (Made from PE Low-density polyethylene plastics) and Non-Woven Polypropylene.
